Kuala Lumpur, Malaysia

Profile

Toxicology researcher studying how e-cigarette use affects male reproductive health. My PhD at Universiti Malaya compares cigarette smokers, e-cigarette users and dual users in Malaysia, linking exposure to testosterone-related microRNAs, mitochondrial function and blood cell changes. I have published 15 peer-reviewed papers as sole or first author and review manuscripts for seven international journals. Open to roles in research, medical affairs, regulatory science and science communication.

Education

Doctor of Philosophy in Pharmacy (Health) Dec 2023 – Dec 2026 (expected)
Universiti Malaya, Kuala Lumpur

Thesis on testosterone-related microRNAs, blood cell abnormalities and sexual desire in Malaysian cigarette smokers, e-cigarette users and dual users.

Bachelor of Science in Microbiology, With Distinction 2019 – 2023
Universiti Malaya, Kuala Lumpur

Experience

Doctoral Researcher Dec 2023 – present
Department of Pharmaceutical Life Sciences, Faculty of Pharmacy, Universiti Malaya

- Conducted a comparative study of cigarette smokers, e-cigarette users and dual users in Malaysia.
- Analyzed testosterone-related microRNAs by qPCR alongside hormone and blood cell profiles.
- Used transmission electron microscopy to assess mitochondrial damage in e-cigarette users and controls.
- Wrote mechanistic and systematic reviews on e-cigarette toxicology, reproductive health and redox signaling.
- Developed an independent project, Cellular Signalling as Dynamic Regulatory Circuits, producing conceptual models of signal resolution in NRF2–KEAP1 redox signaling and YAP/TAZ mechanotransduction.

Peer Reviewer 2025 – present
Seven international journals

Reviews manuscripts in toxicology, pharmacology, reproductive health and public health for American Journal of Preventive Medicine, Journal of Hazardous Materials Advances, Pharmacological Reviews, Progress in Biophysics and Molecular Biology, Toxicology Reports, PLOS One and International Journal of General Medicine.

Intern Oct 2022 – Jan 2023

Indah Water Konsortium Sdn Bhd

Supported laboratory operations during a full-time internship, covering microbiology procedures, water quality testing, sample handling, documentation and technical reporting under standard operating procedures.

Talks and conferences

PhD thesis seminar 1 Oct 2026
Universiti Malaya

Sexual Desire and Nicotine Dependence Among Smokers, E-Cigarette Users, and Dual Users in Malaysia: A Comparative Study
2024
Poster presentation, ISAM Regional Meeting

Early Career Researchers–Postgraduates Research Symposium 2024

ic-PHIR Conference 2023
UiTM Puncak Alam

Training

Systematic Literature Review and Meta-Analysis Workshop	2025
UV-Visible Double Beam Spectrophotometer Workshop, Shimadzu	2025
Quantitative PCR (qPCR) Workshop, Vazyme, Universiti Malaya	2024
ic-PHIR Metabolic Workshop, UiTM Puncak Alam	2023

Skills

Laboratory	qPCR, transmission electron microscopy, molecular biology techniques
Data	SPSS, bioinformatics, data interpretation
Evidence	Systematic reviews, literature synthesis, mechanistic toxicology
Writing	Scientific writing, manuscript preparation, peer review, research conceptualization

	Research areas	E-cigarette and tobacco toxicology, reproductive health, pharmacology, toxicogenomics, molecular systems biology, mechanotransduction and YAP/TAZ signaling

Languages

Malay	Native or bilingual proficiency
English	Professional working proficiency
